ECCi® has reached Microsoft's Gold Partner status in recognition of the company's expertise in Microsoft products, customer satisfaction, and implementation. Microsoft's Gold Partner status is awarded to less than five percent of Microsoft partners worldwide.

ECCi earned their Gold Partner status by having great customer satisfaction scores, having all of their consultants certified on Microsoft products and by helping companies to purchase the appropriate software to meet their strategic goals.

Microsoft's Gold Partner status singles out ECCi's team for being experts in managing a broad range of services, from financial and accounting systems to distribution and manufacturing systems.

Michael Mills, ECCi president and founder, reflects that our consultants have worked long and hard to surpass the difficult testing requirements from Microsoft. It is a true testament of their genuine drive to reach the highest level of achievement awarded by Microsoft.

"Customers are looking for partner companies that can bridge the gap between their business demands and technology capabilities. They need to trust in someone that can act as an expert adviser for their long-term strategic technology plans. Microsoft Gold Certified Partners, which have certified expertise and direct training and support from Microsoft, can build a positive customer experience with our technologies," said Allison Watson, vice president of the Worldwide Partner Sales and Marketing Group at Microsoft Corp. Today, Microsoft recognizes ECCi as a new Microsoft Gold Certified Partner for demonstrating its expertise in providing customer satisfaction with Microsoft products and technology.
